**Project -1**

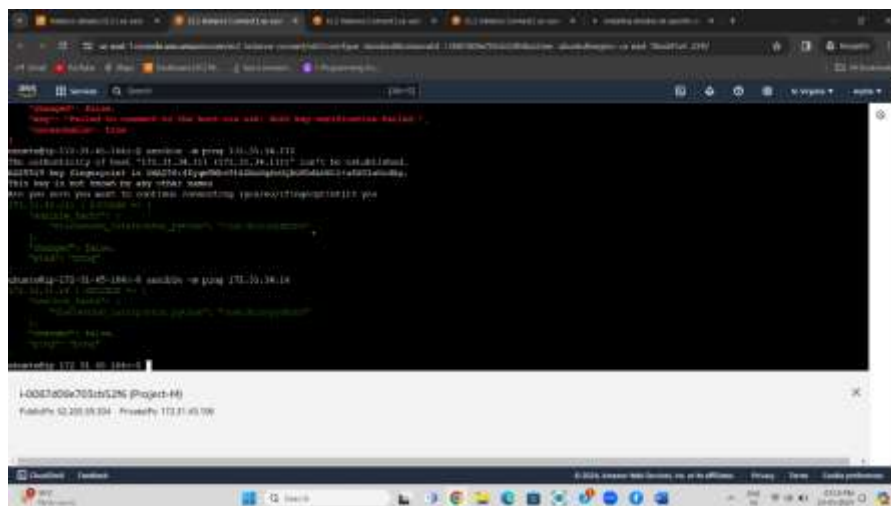

**Step 1: Installing machines**

**Step 2: Installing Ansible**

**Step 3: Install the necessary software on the machines using a configuration management tool**

**Step 4: Installing Jenkins & slaves**

**Step 5: Git workflow has to be implemented**

Hello world!

**Step 6 : If a commit is made to master branch, test and push to prod**

Hello world!!!!!!!!!!!!!!!!

**Step 7: If a commit is made to develop branch, just test the product, do not push to prod**

**Step 8: CodeBuild should automatically be triggered once code is commit**
